

Project Committees

Many of the projects of the Haemophilia Society are run or directed by committees of affected people.

The Society has a wide variety of Advisory Committees, Project Boards and Management Committees which ensure that the work of the projects is correctly targetted and well managed.

Existing and planned committees include:

- The Haemophilia Scotland Management Committee
- The Womens' Board
- The Medical Advisory Committee
- The Youth Forum
- The Get Involved : Get the Best Steering Group
- The Mens' Group
- International Committee

If you are interested in becoming a member of any of these groups or are particularly interested in any area of the Society's work then please get in touch.
